APPENDIX A

Vibrations of the Alphabet

The English alphabet contains 26 letters from A to Z. Within the alphabet, each letter has a specific location. For example, the letter 'J' holds the tenth position, so the numeric value of letter 'J' is 10.

The two-digit numbers can be reduced to nine single digits. In this example, letter 'J' simplifies to $1 + 0 = 1$, the *vibration* of 'J.'

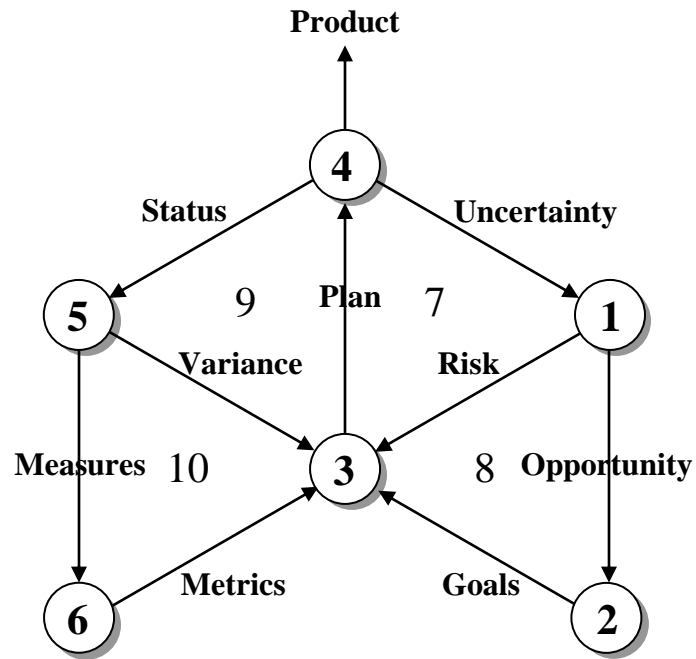

The concept of vibration in a positional language extends to words such that each word has a unique digital signature. For example, the digital signature of 'word' is the four digits: 5694. The vibration of 'word' is the sum: $5 + 6 + 9 + 4 = 26$.

Discover the vibration and digital signature of a letter, word, or a phrase such as your name using the following key:

1	2	3	4	5	6	7	8	9
A	B	C	D	E	F	G	H	I
